www.techkings.se  
Gothenburg

I'm a committed person in my prime years pursuing a professional career in software product development. I aim to leverage the knowledge that I have acquired during my time at the University of Dalarna studying System Development in a professionally. Moreover, I'm looking forward to expand my existing knowledge base with experiences working on challenging problems with peers. The university gave me guidance and taught me how to decompose complex problems into manageable ones. My main objective was to sharpen my method of learning individually and as a part of a group. My free time and childhood years have mainly been spent in front of a computer screen, which has made me comfortable, navigating different operating systems. My passion for computers was the main driving force to pursue systems development & engineering academically. I have a slight inclination (in terms of interest) towards cyber security, blockchain technology and psychology, which I enjoy learning more about. I believe that experience, learning by doing and learning by teaching is the true differentiator. Therefore, I seek an opportunity, where I can grow to become an effective part of a whole, where I contribute, develop and accountably learn from mistakes.

## WORK EXPERIENCE

### Freelancer

Techkings | 2021 - Present

Started Techkings together with a colleague. Techkings helps companies with web development. This has given me some insight into entrepreneurship and appreciation of the importance of customer focus.

### Store worker

Circle K | 2017 - 2020

Weekend work alongside studies. The job has given me a great understanding of the customer perspective and the importance of service. Since the work meant long days alone in the store, my independence played a big role, where I was held accountable to keep the store in good condition with a high level of service at all times.

### Warehouse worker

Cinderella, Stockholm | 2016 & 2017

Warehouse work on the Cinderella ferry between Sweden & Finland. The tasks were to unpack and organize heavy goods. I was also responsible for new employees in my second year, which gave me the opportunity to practice mentorship and communication. Although, the job entailed a high work pace and long shifts, it suited my personality and drive.

### Traffic routing

Viaductia/Vägjobb AB, Örebro | 2013 - 2016

Responsible for sign placement, planning the layout and staff placement. The job involved long shifts and a demanding work environment. In this role, I developed my time-management and patience.

## BOOKS

### Currently reading

Structure and Interpretation of Computer Programs; Harold Abelson, Gerald Jay Sussman

Atomic Habits; James Clear

### Enjoyed books

7 Habits of Highly Effective People; Stephen R. Covey

Can't hurt me Master your Mind and Defy the Odds; David Goggins

How to win friends and influence people; Dale Carnegie

The Psychology of Money; Morgan Housel

## EDUCATION

### BSc in Software development

Dalarna university  
2017 - 2021

## SKILLS

### Programming skills

Bash

Unix/Linux

JavaScript/Angular/React

Python/PHP

HTML/CSS

MySQL

Kotlin

R-Studio

GIS

### Soft skills

Effective communication

Team player

Strong problem solver

Good time management
